

Discover a Simpler Approach to Health IT— Designed for Cardiology

Make life easier by bringing your health IT together

When cardiology practices integrate their electronic health record (EHR), practice management, revenue cycle management (RCM), and patient engagement solutions on one system the result is better outcomes overall. Moreover, cloud-hosted services coupled with health data insights, ensure providers are equipped with the data they need to optimize care in a risk-free and fully supported environment.

What sets us apart from the rest:

- **Full-circle approach**—implementation tailored to your unique needs
- **Personalized training**—extensive training on time, and on budget
- **Live nationwide call support**—average support response time of two hours, compared to the industry average of two days
- **Ongoing solution evaluation**—solutions are continuously updated and new features are developed to meet your evolving needs
- **Quality Program Services**—Hands on regulatory training provides an added layer of guidance so you can focus on patient care

Digital front door and care anywhere

- Empower patients to engage with your practice via a robust patient engagement platform
- Use remote patient monitoring to improve outcomes for patients with chronic care conditions
- Decrease staff time spent on tedious tasks and reduce no-shows with mobile self-scheduling, appointment reminders, bill pay, and Rx refill requests
- Reduce waiting room time by enabling patients to confirm personal information, complete intake forms, and provide insurance information before the appointment

Secure every dollar you earn

- Provide an informative check-in and billing experience for patients
- Automate charge creation and create custom coding rules
- Maximize financial performance with clean claims and A/R management
- Capture everything you've earned with customized contract audit and recovery

BENEFITS

Content updated regularly

A team of cardiology providers and developers collaborate to keep content current.

Cardiology board of advisors

Design and functionality enhancements are suggested by cardiologists, for cardiologists.

Cardiology device connectivity

Get optional integration to PACS, stress tests, nuclear medicine, ECG/EKG, and more.

NextGen Healthcare
RCM clients average
a 98% first-pass clean
claims rate.¹

The standard best-practice clean
claims rate is 80%.

CARDIOLOGY-SPECIFIC FEATURES

EHR

More than 400 cardiology-specific enhancements, including:

- Documentation and workflows for your specialists—general/non-invasive, invasive, interventional, EP, and vascular
- ScoreCard™ captures and trends cardiovascular risk factors such as HAS-BLED, NYHA, CHA2DS2-VASc, Framingham, MESA, WHO/PAH, pooled cohort, and weight over time
- Device connectivity to your PACS, pacemakers, stress tests, nuclear medicine, ECGs/EKGs, labs, and other data
- Automated AUC workflow—integrated and intuitive workflow for Appropriate Use Criteria (AUC) scoring
- Cardiology MIPS dashboard to document required data elements for the most common and complex cardiology measures
- Disease monitoring and notifications to help track patients' congestive heart failure, hypertension, and more
- Single-click copy forward functionality for side-by-side workflow comparison of previous to current encounters
- Flexible documentation to accommodate individual workflows within your practice, including quick-save templates, voice recognition, free text, and digital pen technology
- Generate 90% accurate SOAP notes, prior to physician review, from normal patient-provider conversations with NextGen® Ambient Assist

Practice Management

An integrated platform helps:

- Lower IT overhead with single database management
- Share demographic data and reduce double entry
- Conduct HIPAA-compliant MPI searches for patients from other practices
- Support a single chart while securing financial data

Awarded Top Customer Service Accolades by the Stevie® Awards for 7 Consecutive Years
